SKILLS

- **Languages:** Python, C, C++, Java, SQL
- **Frameworks & Libraries:** HTML, CSS, NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn
- **Tools & Platforms:** MySQL, Excel, Power BI, GitHub, VS Code
- **Core CS:** Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Soft Skills:** Team Player, Adaptability, Leadership

INTERNSHIP

- **Infosys Springboard | Virtual Internship** Feb' 26 – Present
 - Engineered CivicPulse, a Smart City grievance portal for real-time complaint registration and tracking.
 - Established role-based access and automated complaint assignment with SLA monitoring using Spring Boot and MySQL.
 - Integrated a responsive React frontend with REST APIs for seamless grievance submission and status updates.
Tech: Java, Spring Boot, React, MySQL

PROJECTS

- **Smart Fraud Transaction Dashboard | GitHub** Oct' 25 – Nov' 25
 - Created an interactive fraud analytics dashboard evaluating 100K+ financial transactions, enabling real-time monitoring of suspicious activity across regions and transaction types.
 - Executed data cleaning and DAX-based KPI development, including Fraud Rate % and Fraud Amount.
 - Constructed visual reports to uncover high-risk categories and regions contributing to ~70% of fraud cases.
Tech: Power BI, DAX, Power Query, Data Modeling, Fraud Analytics
- **Student Marks Analyzer | GitHub** Jun' 25 – Aug' 25
 - Designed a robust mark-processing system in C++ leveraging arrays and modular programming to evaluate 100+ student records efficiently.
 - Implemented score analytics to calculate class averages and identify top 5% and bottom 10% performers.
 - Applied fundamental data-processing logic to organize, validate, and retrieve student records with accuracy.
Tech: C++, Arrays, Functions, Bubble Sort, Linear Search
- **Hotel Booking Assistant Chatbot | GitHub** Jan' 25 – Apr' 25
 - Built an AI-powered chatbot using NLP to interpret user queries and deliver real-time, accurate hotel recommendations
 - Developed a responsive hotel search interface with smart filtering by price, ratings, and amenities to enhance user decision-making.
 - Integrated booking redirection and personalized suggestions to improve user experience.
Tech: HTML, CSS, JavaScript, NLP, APIs, Machine Learning Concepts

TRAINING

- **Lovely Professional University (LPU), Punjab | Certificate** Jul' 25 – Aug' 25
 - Attended an intensive summer training program on Data Structures & Algorithms, focusing on problem-solving using C++
 - Practiced core structures including arrays, linked lists, stacks, queues, trees, and graphs with coding exercises
 - Solved 100+ algorithmic problems to improve time-space complexity analysis and logical thinking
Key Skills: Arrays, Linked Lists, Stacks, Queues, Recursion, Sorting, Searching Algorithms

CERTIFICATES

- Data Analytics Job Simulation – Deloitte | [Link](#) Jun' 25
- Completed Cloud Computing – NPTEL | [Link](#) Apr' 25
- The Bits and Bytes of Computer Networking – Coursera | [Link](#) Nov' 24
- Responsive Web Design – Free Code Camp | [Link](#) Oct' 23

ACHIEVEMENTS

- Solved 100+ LeetCode problems on Data Structures, Algorithms, and time-space optimization. Jan' 26
- Advanced to Round 2 at ECHO – HackWithVertos 1.0 Hackathon among 100+ participants. Feb' 24

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.36** Aug' 23 – Present
- **Sri Chaitanya Junior College** Hyderabad, Telangana
Intermediate; **Percentage: 74%** Jun' 21 – Mar' 23
- **St. Arnold's High School** Hyderabad, Telangana
SSC; **Percentage: 83%** Jun' 20 – Mar' 21
